ABSTRACT

Description

Beauty Parlour Management System is a web-based management system with appointment scheduling functionality. It connects customer, parlour and stylists in online community and allowing user to browse stylists and book or cancel appointments. This system provides an easier way to keep a track of all the activities of a beauty parlour. User can review the services using this system and can make appointment with favourite stylist on particular date and time. Keep a record of relevant details like Customer details, Employee details, Services, Appointments, Sales details etc.

Existing System

In present system you have to call the parlour to fix an appointment. After taking an appointment you have to remember or record the date of the appointment, it may result to data redundancy and lose of data. User can find out the services of any parlour only after taking their services. In current system, parlour take appointment and manage customer record on register. And it is very difficult to find out old appointment and other details in this system.

Some limitations of existing system are:

- More man power required
- Time consuming
- Records are stored in register

Proposed System

Beauty Parlour System is developed to automate all the activities of the parlour. This system provides services to only registered customers who already took the appointment online. It is paperless process so we can record all the information like customer details, employees details, appointments, sales details etc without fail in this system. It is very easy and fast compared to existing system and also time saving.

Module description

The modules are

- Admin
- Employee
- Customer

Admin

- Add employee and customer
- Remove employee
- Add and update services
- Approve or reject appointment of the customer
- Assign services to employees
- Approve or reject leave request of employees
- Schedule employee services

Employee

- Request for leave
- View customer list
- Edit profile
- View leave status (Requested/approved/rejected)

Customer

- Take appointment
- View services and staff list
- View appointment status (Requested/approved/rejected)
- Edit profile

DATA BASE DESIGN

Table No 01: tbl_login

Primary Key : login_id

Foreign key :

| SI NO | Field name | Data type | Description |
|-------|------------|-----------|---------------------------------|
| 1 | login_id | Int | Primary key |
| 2 | username | Varchar | Username given by the user |
| 3 | password | Varchar | Password for the user's account |
| 4 | user_type | Varchar | Type of the user |
| 5 | status | Int | Status |

Table No 02: tbl_registration

Primary Key : reg_id

Foreign key : login_id

| SI NO | Field name | Data type | Description |
|-------|------------|-----------|--------------------------|
| 1 | reg_id | Varchar | Primary key |
| 2 | login_id | Int | Foreign key |
| 3 | name | Varchar | Name of the user |
| 4 | address | Varchar | Address of the user |
| 5 | email_id | Varchar | Email |
| 6 | phone | Varchar | Phone number of the user |
| 7 | dob | Varchar | DOB |

| | | | |
|----------|--------|---------|---|
| 8 | status | Varchar | To check whether user is available or not |
|----------|--------|---------|---|

Table No 03: tbl_booking

Primary Key : booking_id

Foreign key : reg_id

| SI NO | Field Name | Data type | Description |
|----------|------------|-----------|-----------------------------------|
| 1 | booking_id | Int | Primary key of booking table |
| 2 | reg_id | Int | Foreign key of registration table |
| 3 | date | Varchar | Date |
| 4 | services | Varchar | Name of services |
| 5 | status | Varchar | Status |

Table No 04: tbl_service

Primary Key : service_id

Foreign key :

| SI NO | Field name | Data type | Description |
|----------|--------------|--------------|----------------------------------|
| 1 | service_id | Int | Primary key |
| 2 | service_name | Varchar2(20) | Services provided by the parlour |
| 3 | amount | Number(8,5) | Amount of the service |
| 4 | description | Varchar2(50) | Description about the service |
| 5 | duration | Varchar2(20) | Duration of the service |
| 6 | image | File | Image of the service |
| 7 | status | Varchar | Status |

Table No 05: tbl_category

Primary Key : cid

Foreign key :

| SI NO | Field Name | Data type | Description |
|-------|------------|-----------|-------------------------------|
| 1 | cid | Int | Primary key of category table |
| 2 | name | Varchar | Category name |
| 3 | status | Varchar | Status |

Table No 06: tbl_staff

Primary Key : staff_id

Foreign key :

| SI NO | Field name | Data type | Description |
|-------|------------|-----------|---------------------------|
| 1 | staff_id | Int | Primary key |
| 2 | staff_name | Varchar | Name of the staff |
| 3 | status | Varchar | Staff is available or not |

Table No 07: tbl_staff-service

Primary Key : staff_id

Foreign key :

| SI NO | Field name | Data type | Description |
|-------|------------|-----------|-------------|
| 1 | sid | Int | Primary key |
| 2 | staff_id | Int | Foreign key |
| 3 | service_id | Int | Foreign key |

Table No 08: tbl_appointed-list

Primary Key : list_id

Foreign key : booking_id

| SI No | Field name | Data type | Description |
|-------|------------|-----------|-----------------|
| 1 | list_id | Int | Primary key |
| 2 | booking_id | Int | Foreign key |
| 3 | status | Varchar | Approved or not |

Table No 09: tbl_complaint

Primary Key : cid

Foreign key :

| SI NO | Field Name | Data type | Description |
|-------|------------|-----------|--------------------------------|
| 1 | cid | Int | Primary key of complaint table |
| 2 | fname | Varchar | First name |
| 3 | lname | Varchar | Last name |
| 4 | email_id | Varchar | Email |
| 5 | msg_date | Varchar | Date |
| 6 | category | Varchar | Category of complaint |
| 7 | complaint | Varchar | Complaint |
| 8 | replay_msg | Varchar | Replay message |
| 9 | status | Varchar | status |

Table No 10: tbl_feedback

Primary Key : fid

Foreign key :

| SI NO | Field Name | Data type | Description |
|-------|------------|-----------|-------------------------------|
| 1 | fid | Int | Primary key of feedback table |
| 2 | fname | Varchar | First name |
| 3 | lname | Varchar | Last name |
| 4 | category | Varchar | Category feedback |

FORM DESIGN

1. Registration form
